

SAFETY DATA SHEET

November 2017.R1 PRODUCT CODE: FUN00

UNIVERSAL FUNGAL WASH SOLVENT

Product Description	:	*A water based biocidal fungal and bacterial wash.
Application Areas	:	*Dirty and / or weathered cementitious substrates or ceiling boards where there is evidence of any fungal spores.
Product Features	:	*A fungal treatment suitable for use in the harsh urban / Industrial environment. *Removes any fungal growth in porous substrates, prior to priming and application of any chosen Universal Undercoat or Topcoat.
Surface Preparation	:	*Surfaces need to be abrasively sanded or wire brushed.
Application Procedure	:	*Apply a generous amount of Universal Fungal Wash to the area which needs to be treated, with a cloth, mop or a brush. *Spread rate of 10 to 12 m ² /ℓ *Wait for 12 hours for Universal Fungal Wash to penetrate the porous surface. *Scrub area with a hard fibre brush. *Rinse treated area with copious amounts of clean tap water. *Allow treated surfaces to dry thoroughly. *Drying time is totally dependent on ambient weather conditions.
General	:	*Surfaces can now be coated with the range of Universal Primers, Undercoats, before applying decorative, water or solvent based Topcoat. *Available in 1ℓ, 5ℓ and 20ℓ
Precautions	:	*This product is non-flammable. * Corrosive to metal. * Skin irritant. * Wear protective goggles and gloves during application. * Rinse with copious amounts of fresh tap water if Universal Fungal Wash accidentally comes into contact with skin.
